

Roman Generation

Roman Generation is a band founded by Roman and Peter, two artists with various musical inspirations and experiences.

Roman is coming from the Punk-Rock scene of Savoie and in 2006, he's achieving a tour with his band «Stuff» with almost hundreds of concerts in France and Switzerland.

After 7 years of heavy sound, the band is dismantled when Roman moves to Paris.

Meanwhile, Peter has its first experiences with electronic music and guitars. In 2007 he records with its band «Silicium» his first 3 titles EP at home with his available gear.

In the beginning of 2008, after 3 years of mixed compositions the band disappears.

Roman Generation starts by chance during the summer 2008 when Roman is looking for someone to record several acoustic songs, freshly written.

Those firsts songs are recorded in the Peter's home-studio and a new band appears : Roman Generation.

During 2010 Roman and Peter work together for their album «Jetplane», released in the last months of the year. The album is a mix of diverse experiences coming from folk to cold-wave. This first record is for them the best way to learn how to play together, how to mix their inspiration and how to master recording and mixing techniques.

A set of concerts will take place in 2011, from Paris to Annecy (Savoie).

This same year is the occasion for them to work on a new album. This second record is the occasion to invite other artists to play with them : violins, bagpipes and other singer appears on the tracks.

This second album, called «Reverse» has been released in january 2012.
